Urbanism and cities on the horizon - Seminar ETSAB 9.30 am
Searching in depth - Opening of the exhibition COAC 6.30 pm

LUB is turning 50
It is a research and teaching center at the Universitat Politècnica de Catalunya - Barcelona Tech within the Urban Design Department. Its foundation in 1969 brought together, under the initiative of Manuel de Solà-Morales, professors J. Busquets, A. Font, M. Domínguez and J.L. Gomez Ordóñez at the Barcelona School of Architecture. Since then, several promotions of students have participated in the Laboratory initiatives and many teachers have carried out here their research. The continuity of the Research Group has awakened architects to the urban repercussion of their work.
